

Co-hosted by CEA and AFT Connecticut

# Future Problem Solving in a Pandemic World

How to bring this enrichment program to your school!

**February 9 | 5:00 to 6:00 PM**

At a time when several after-school programs have been cancelled or postponed, Future Problem Solvers of Connecticut is a way for you to offer rigor and critical thinking skills to your students as a weekly enrichment opportunity. The virtual program, for students in grades 4-12, offers excellent opportunities for communication, creativity, collaboration, and research in solving real-world problems.

Join us to learn more about this program as we give examples using our topics for this year, Youth in Competitive Sports, Wearable Technology, Human Environmental Impact, and Personalized Medicine. We will talk about how the program works, different ways to participate, and what you will need to get started.
